Re: Second Update to November 28, 2005 Compliance Letter of Vonage America Inc.; WC Docket No. 05-196

Dear Ms. Dortch:

Vonage America Inc. ("Vonage") submits this update to its November 28, 2005 Compliance Letter to advise the Commission of the current status of VoIP E911 PSAP readiness.

As was reported on November 28, 2005, Vonage is capable of transmitting ANI and Registered Location information for 100% of its subscriber lines. Vonage also reported that it had established connectivity to selective routers for more than 90% of those lines. In its December 16, 2005 First Update to the November 28, 2005 Compliance Letter, Vonage reported that as of December 13, 2005, 33% of Vonage's customers were served by PSAPs capable of receiving VoIP E911 calls.

Vonage can report that since December 13, 2005, an additional 685 PSAPs, serving approximately 13.5% of Vonage's customer lines, are now capable of receiving VoIP E911 or VoIP 911 calls ("Capable PSAPs") -- bringing the current total number of Capable PSAPs to 1569. As of January 24, 2005, approximately 46.5% of Vonage's customer lines have the benefit of call delivery to Capable PSAPs. A complete list of Capable PSAPs is provided in Appendix A.

Questions regarding the foregoing information may be addressed to the undersigned.

Respectfully submitted,

/s/

William B. Wilhelm, Jr.
